NIKKO Pharmaceutical Co., Ltd.

NIKKOBAN : adhesive fabric bandage

NIKKOBAN is a hygienically and very sticky adhesive bandage.

Features

- This is a very sticky adhesive bandage based on material of stout cloth made from durable fabric natural rubber.
- It suppresses suppuration since gauze part uses sterilization disinfectant acrinol.
- It has a waterproof structure to prevent pad from contamination; therefore, the affected part can keep hygienically.

PLATINABAN : adhesive fabric bandage without gauze

PLATINABAN is a adhesive bandage without gauze that formulates “antimicrobial component platinum particles.”

Features

- This is a new type of adhesive bandage including platinum particles to adhesive. It is found that platinum has antibacterial properties by Nano sizing.
- This is a adhesive bandage without gauze, hygienically guard the cracked and chapped skin with the antibacterial adhesive surface.
- Surface gets wet in water but will not soak inside because of waterproof structure. It keeps affected part hygienically.
- It can be used as cut piece too.

ABEND : elastic adhesive fabric bandage

Abend is a soft sticky elastic bandage and cause less rash than normal bandage.

Features

- It is made of cloth of which expansion rate is over 30%.Therefore it causes less resistance to body movement as well as to skin irritation, and reduces burden while using.
- It suppresses skin rash because it has acrylic adhesive with less skin irritation and moderate moisture permeability.
- It sticks well to any parts and can be fixed more firmly than paper surgical tape.
- Normally, it would be cut by scissors but this tape can be cut by hand too.
